

Tabula nostra, quae nunc Vindobonae in bibliotheca Imperatoria conservatur, initio saeculi XVI a Conrado Celtes Colmari inventa, tum Peutingero (Aug. Vindel.) testamento legata est. Segmentorum XII primum non iam exstat. Cetera singula alta sunt cm. 34, longa cm. 59. 65. Tota tabula met. 6 cm. 82 longa est. Praeter ea nomina, quae in hac effigie deminuta inventiuntur, locorum in ipsa tabula certis signis distinctorum innumera alia vix adscripta sunt, quibus, additis intervallorum mensuris, singula oppida conjuncta sunt. Dubium non est, quin Tab. Peut. saec. XIII ex vetustiore quodam exemplari sit descripta.
